

KENNITH KHEMBER A VILLEGAS

COMPUTER SCIENCE GRADUATE

Northern Junob, Dumaguete City | khembervill@gmail.com | 09753066898 | <https://github.com/EyeCodes>

SUMMARY

An ambitious and technically skilled Computer Science graduate with a demonstrated ability to deliver under pressure, evidenced by winning the Hackfusion Hackathon. Brings hands-on experience in leadership and full-stack development gained during on-the-job training, building a strong foundation in modern frameworks like Laravel and React. Proven leadership skills include guiding a backend development team, assigning tasks, conducting code reviews, and providing technical support. Practical portfolio features a Laravel inventory management system deployed via Ubuntu CLI and Docker, alongside a React suggestion box hosted on Firebase. Experienced in creating and testing APIs, with additional experience utilizing PostgreSQL, MariaDB, and AWS.

TECHNICAL SKILLS

Microsoft Word
Microsoft Excel

HTML
CSS
JavaScript
PHP

React
Laravel
Tailwind

MariaDB
Redis
PostgreSQL
Firebase

WORK EXPERIENCE

BlueBeans (Intern) – Team Leader, Team Coordinator, Backend Developer, Code Reviewer, API Development, AWS, And Code Inheritance.

DepEd - Supply Office (Intern) – Full Stack Development, Data Entry, Document Management, Data Record, and Physical Labor.

EDUCATION

Negros Oriental State University - 2026
Bachelor of Science in Computer Science

BIT- International College - 2020
Junior Highschool Graduate

Dr. Cecilio Putong National High School – 2022
Senior Highschool Graduate - STEM

Cogon Elementary School - 2016
Elementary School Graduate

PROJECTS

Rsafty – a project developed for a hackathon event, a community platform that follows SDG 16 principles using Laravel.

Suggestion Box – a personal project I created hoping to be used for department organization, an account free suggestion box using react and deployed using firebase hosting.

Inventory System – a web base system developed by me during my OJT features includes CRUD of items, roles, forms/documents create, generate, and print, sorting, etc. using Laravel and deployed using CLI ubuntu and docker.

ADDITIONAL INFORMATION

- **Languages:** English, Filipino, Cebuano.
- **Winner, Hackfusion Hackathon | (May 2, 2025)**
 - Competed as part of a team to conceptualize, develop, and present a functional web application from scratch. Our project, built with the Laravel framework, was judged best overall for its innovation, technical execution, and presentation.
- **Dean Lister | Negros Oriental State University**
 - Awarded for outstanding academic performance during my first year of university studies at Negros Oriental State University
